

This book is part of the European Science Foundation (ESF) programme 'Occupation in Europe: The Impact of National Socialist and Fascist Rule'.

ISSN: 1753-7894

The ESF is an independent, non-governmental organization of national research organizations.

Our strength lies in the membership and in our ability to bring together the different domains of European science in order to meet the scientific challenges of the future. The ESF's membership currently includes seventy-seven influential national funding agencies, research-performing agencies and academies from thirty nations as its contributing members.

Since its establishment in 1974, the ESF, which has its headquarters in Strasbourg with offices in Brussels and Ostend, has assembled a host of research organizations that span all disciplines of science in Europe, to create a common platform for cross-border cooperation.

We are dedicated to supporting our members in promoting science, scientific research and science policy across Europe. Through its activities and instruments ESF has made major contributions to science in a global context. The ESF covers the following scientific domains:

- Humanities
- Life, Earth and Environmental Sciences
- Medical Sciences
- Physical and Engineering Sciences
- Social Sciences
- Marine Sciences
- Nuclear Physics
- Polar Sciences
- Radio Astronomy Frequencies
- Space Sciences

This series includes

Vol. 1

Surviving Hitler and Mussolini: Daily Life in Occupied Europe
Edited by Robert Gildea, Olivier Wieviorka and Anette Warring
